

Rubber Processing, Mixing, And Compounding Symposia 1999-2004

Papers Presented at the meetings Of the Rubber Division, ACS

Papers available for \$15 each for Division members, \$35 each for non-members from:

Christopher Laursen
Science & Technology Librarian
Rubber Division, ACS
The University of Akron
Auburn Science & Engineering 104
Akron, Ohio 44325-3907 USA
phone: 330-972-7197
fax: 330-972-5574
email: laursen@uakron.edu

Fall 1999

139 Selection of Downstream Equipment in the Mixing Room

Walter Haeder, Krupp Elastomertechnik GmbH , GER

140 Rubber Mill Applications in Compounding Operations and Material Preparation - Upgrading Older Mills for Improved Operation and Safety

Lawrence R. Gooch, Gooch Engineering Associates

141 Zero Pressure Extrusion

Nick Kocher, RMS Corporation , CAN

Cliffe Tubbe, RMS Corporation , Canada

142 Advancements in Continuous Elastomer Processing on Twin Screw Extruders

Walter A. Ploski, Krupp Werner & Pfleiderer

Rodney K. Williams, Aspen Research Corp.

143 Extrusion and Continuous Vulcanization of Profiles

Gerd Capelle, Berstorff GmbH , GER

144 Improve Operating Efficiency in Material Prep with Continuous Splice Width Measurement

Erik A. O'Neil, Bitwise Measurement Systems USA

88 Rubber/Filler-Batches in Powder Form--A Contribution to a Simplified Production of Rubber Compounds

U. Gori, Pulverhauptschuk Union GmbH , Germany

H. Lauer, Pulverhauptschuk Union GmbH , Germany

90 Improved Productivity With Rubber Injection Moulding

Ewald Lichtenegger, Maplan Maschinen und technische Anlagen , Austria

91 The Automation of QS9000 by Process Control Computers

Christopher J. Kent, Chronos Richardson

110 Continuous Mixing of Powder Rubber on a Twin Screw Extruder

Robert H. Schuster, Deutsches Institut fur Kautschuktechnologie e.V. , GER

Olaf Skibba, Deutsches Institut fur Kautschuktechnologie e. V. , Germany

Reinhard Uphus, Deutsches Institut fur Kautschuktechnologie e.V. , GER

111 Various Clearance Mixing Technology

Brian J. Thompson, Kobelco Stewart Bolling, Inc.

David A. Norman, Kobelco Stewart Bolling, Inc.

113 Operational Characteristics of the Farrel Shaw Intermix Internal Mixer

S. N. Ghafouri, Farrel Ltd. , UK
Albert McGuinness, Farrel Ltd. , UK

114 Variable Friction Drives for Mixers and Roll Mills

Lars Lattstrom, Hagglunds Drives, Inc.

115 Batch-Off Retrofits: Low Investment Alternative for High Process Performance

Phillip A. Rastok, VMI Americas, Inc.

171 Using Real-Time Impedance Measurement to Monitor and Control Rubber Vulcanization During Cure

Richard Magill, Signature Control Systems

174 Investigation of Binary Systems of Acrylonitrile-Butadiene Copolymers and Stearic Acid, Zinc Stearate or Calcium Stearate--A Contribution to Understanding the Behavior of NBR Mixtures in Injection Molding

Hans Magg, Bayer AG , GER

176 Removing Fouling Residue from Rubber Products Molds In-The-Press With Solid CO2 Pellet Blasting

Frederick C. Young, Cold Jet, Inc.

Spring 2000

1 Practical Rheology of Rubber Compounds

Jean L. Leblanc, Univ. P. & M. Curie , BEL

2 The Influence of Raw Material Parameter Variations in the Mixing Room

H. Keuter, University of Paderborn , Germany

A. Limper, University of Paderbon , Germany

C. Ruter, University of Paderborn , Germany

3 Understanding the Influence of Polymer and Compounding Variations on the Extrusion Behaviour of EPDM Compounds II: The Effect of Controlled Long Chain Branching

H. John H. Beelen, DSM Elastomers Europe BV , The Netherlands

Jacques W.M. Noordermeer, DSM Elastomers BV , NET

4 Development of the 6-Wing Rotor for Internal Mixers

K. Inoue, Kobe Steel Ltd. , Japan

K. Takakura, Kobe Steel Ltd. , Japan

N. Yamada, Kobe Steel Ltd. , Japan

5 The Farrel MVX (Mixing Vented Extruder)

Geoff Purdy, Farrel Corporation

Walter A. Rapetski, Farrel Corporation

6 Mixing of Silica Compounds from the View of a Mixer Supplier

Maik Rinker, Krupp Elastomertechnik GmbH , Germany

Walter M. Haeder, Krupp Elastomertechnik BmbH , Germany

Dieter Berkemeier, Krupp Elastomertechnik GmbH , GER

13 Modeling of the Mixing Process and On-line-prediction of the Rubber Compound and Molded Part Properties with Intelligent Process Analysis Technologies

Edmund Haberstroh, Institute of Plastics Processing , Germany

Peter Ryzko, Institute of Plastics Processing , Germany

14 On the Dependency of Tire Performance and the Degree of Mixing

D. Nichetti, Pirelli Pneumatici SpA , Italy

R. Pessina, Pirelli Pneumatici SpA , Italy

P. van Raepenbusch, Pirelli Pneumatici SpA , Italy

15 Knowledge Gap in Characterization of Reinforcing Fillers, Structure-Processability Relation of Agglomerates

N. Nakajima, The University of Akron

16 New Processing Strategies for the Continuous Mixing of Rubber Compounds

Olaf Skibba, Deutsches Institut für Kautschuktechnologie e. V. , Germany
Robert H. Schuster, Deutsches Institut für Kautschuktechnologie e.V. , GER
Reinhard Uphus, Deutsches Institut für Kautschuktechnologie e.V. , GER

16A Powder Rubber-- A New Raw Material Generation for the Simplification of the Production Processes in the Rubber Industry

U. Gori, PKU Pulverkautschuk Union GmbH , Germany
M. Schmitt, PKU Pulverkautschuk Union GmbH , Germany

17 Recent Developments in the Extrusion of Tire Components

Hans J. Gohlisch, Paul Troester Maschinenfabrik , GER

18 Numerical Simulation of Complex Flow in Extrusion Processing of Rubber

Junsuo Sun, Fluent
Minwu Yao, The Goodyear Tire & Rubber Company

25 Better Process Description For The Extrusion Of Silica And Carbon Black Compounds

A. Limper, University of Paderborn , Germany
D. Schramm, University of Paderborn , Germany

26 Injection Molding of Elastomers: Process Model with Statistic Experimental Design

Rich Magill, Signature Control
Tom Dendinger, Cooper Standard Automotive
Hans-Joachim Graf, Cooper Standard Automotive , CAN

27 A Fundamental Approach of the Cord Calendering Process

Gerard Nijman, Vredestein Banden BV , NETHERLANDS

28 Real-time Control of Vulcanizate Cure Times and Properties Using In-Mold Sensors

Richard Magill, Signature Control Systems

Fall 2001

106 Wing Function Technology - A New Rotor Technology for the Farrel Banbury Mixer

L. N. Valsamis, Farrel Corporation

F. J. Borzenski, Farrel Corporation

107 Optimizing Mixing in the Farrel Banbury Mixer with Wing Function Technology (WFT) Rotors

F. J. Borzenski, Farrel Corporation

L. N. Valsamis, Farrel Corporation

108 Compounding and Extrusion of TPV's; New Development of Machinery Equipment

Reinhard Uphus, Berstorff GmbH , Germany

109 A New Gear Pump for Rubber Extrusion

Reinhard Uphus, Berstorff GmbH , Germany

58 Production of Petroleum Plasticizers

Jimmy M. Rasco, Ergon Refining

59 Light-Colored Paraffinic Oils in Rubber Processing

William D. Nash, Pennzoil-Quaker State Company

60 Structure-Property Relationships for Plasticizers

R. H. Schuster*, Deutsches Institut für Kautschuktechnologie e.V. , Germany

H. Geisler, Deutsches Institut für Kautschuktechnologie e.V. , Germany

H.-M. Issel, Rhein Chemie Rheinau GmbH , Germany

61 High Performance Ester Plasticizers

Stephen E. O'Rourke, The C. P. Hall Company

77 Use of Acrylate and Polybutadiene Coagents as Reactive Plasticizers

Clay B. McElwee, Sartomer Company, Inc.

78 Techniques for Achieving High Hardness EPDM Formulations

Rajan Vara, DuPont Dow Elastomers, L.L.C.

Christopher Grant, DuPont Dow Elastomers, L.L.C.

Christian Daniel, DuPont Dow Elastomers S.A. , Switzerland

79 Zinc Soap Effects of TESPT and TESP D Treated Silica Compounds on Processing and Silica Dispersion During Mixing in Natural Rubber

Kwang-Jea Kim, Struktol Company of America

John VanderKooi, Struktol Company of America

Fall 2002

72 Continuous Mixing: A Challenging Opportunity?

Gerard Nijman, Vredestein Consulting BV , The Netherlands

73 Production and Application of Silica Loaded Powder Rubber Based on E-SBR

Udo Goerl, Degussa AG , Germany

74 NR/Carbon Black Masterbatch Produced with Continuous Liquid Phase Mixing

Meng-Jiao Wang*, Cabot Corporation

Ting Wang, Cabot Corporation

Yee Ling Wong, Cabot Corporation

James Shell*, Cabot Corporation

Khaled Mahmud, Cabot Corporation

75 Continuous Tangential Mixing of Elastomers

Peter Wickenheisser, Farrel Corporation

76 The Single-Rotor Continuous Mixing System (Carter Continuous Compounder and Carousel Blender)

Philip K. Freakley, Loughborough University , UK

Jonathan B. Fletcher, Carter Bros. (Rochdale) Ltd. , U.K.

77 Further Process Advantages, Chances and Applications of Extruder Gear Pump Systems

Olaf Skibba, A-Z Formen- und Maschinenbau GmbH , Germany

Oliver Thoma, A-Z Formen- und Maschinenbau GmbH , Germany

88 Process Analysis of the Plastification of Rubber Compounds using Gear Pumps

Tom Wilhelmsmeyer, Universitat Paderborn , Germany

Andreas Limper, University of Paderborn , Germany

89 Twin-Screw Rubber Mixing and Extrusion Concepts

Reinhard Uphus, Berstorff GmbH , Germany

90 Twin Screw Mixer for Rubber Compounding

Luigi Pomini, Techint-Pomini , Italy

Roberto Regalia, Techint-Pomini , Italy

91 Continuous Mixing---New Concepts

Bernhard Fritsche, Buhler AG , Switzerland

Christoph Naef, Buhler AG , Switzerland

92 Innovative Processing of Elastomere Masses

Michael W. Batton, ENTEX Rust & Mitschke GmbH , Germany

93 Progress in the Development of the Continuous Rubber Mixing Process by Twin-Screw Extrusion

A. Amash, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

M. Bogun, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

R. H. Schuster*, Deutsches Institut für Kautschuktechnologie e.V. , Germany

107 Continuous and Discontinuous Mixing Under Aspects of the Material Quality

Liviu C Muresan, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

M. Bogun, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

A. Amash, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

Robert H. Schuster*, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

H.-J. Radusch, Martin-Luther-Universitat , Germany

108 Continuous Mixing and Compounding of Polymer/Filler and Polymer/Polymer Mixtures with the Aid of Ultrasound

A. I. Isayev, The University of Akron

109 Review of Semi-Continuous Compounding of Rubber

Narku O. Nortey, Skinner Engine Company

110 Magnetic Resonance Crosslink Density Measurements as a Tool for Quality Assurance of Rubber Compounds

Winfried Kuhn, IIC Innovative Imaging Corporation , Germany

Stefan Kelbch, Bayer AG , Germany

Ulrich Giese, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

Robert H. Schuster*, Deutsches Institut fur Kautschuktechnologie e.V. , Germany

111 Powder Rubber Systems in the Continuous Mixing Process under Economical Aspects

Udo Goerl, Degussa AG , Germany

112 Effect of Zinc Oxide on the Reaction of TESPT Silane Coupling Agent with Silica and Rubber

L. A. E. M. Reuvekamp, Twente University , The Netherlands

S. C. Debnath, Twente University , The Netherlands

J. W. ten Brinke, Twente University , The Netherlands

P. J. van Swaaij, Twente University , The Netherlands

J. W. M. Noordermeer, University of Twente , The Netherlands

104 Rheology of PVC Plastisol - VIII. Mechanism of Non-Linear Viscoelastic Behavior

N. Nakajima, The University of Akron

E. R. Harrell, Polymer Diagnostics, Inc.

105 New Insights into the Mastication Process

K.-H Menting, Schill + Seilacher , Germany

M. Hensel, Schill + Seilacher Struktol AG , Germany

T. Mergenhagen, Schill + Seilacher "Struktol" Aktiengesellschaft , Germany

H. Umland, Schill + Seilacher Struktol AG , Germany

106 Productivity Enhancements in Difficult to Mix NR Compounds

Frederick Ignatz-Hoover, Flexsys America L.P.

Fall 2003

24 Liquid Phase Mixing: The Future of Natural Rubber Compounding for Productivity and Performance

Ting Wang, Cabot Corporation

Meng-Jiao Wang*, Cabot Corporation

James Shell*, Cabot Corporation

Yee Ling Wong, Cabot Corporation

Viktor Vejins, Cabot Corporation

80 The Chemistry of Anti-Degradants

Peter R. Dluzeski, GEO Specialty Chemicals

Charles B. Helms, GEO Specialty Chemicals

97 Organic Phosphite Stabilizers (OPS)

Don R. Stevenson, Dover Chemical Corp.

Daryl L. Stein, Dover Chemical Corporation

Ryan Reese, Dover Chemical Corporation

Michael Jakupca, Dover Chemical Corporation

98 Quinonediimine Antidegradant for Cost Saving-Productivity in Various Grades of Natural Rubber

Byron H. To, Flexsys America L.P.

Frederick Ignatz-Hoover, Flexsys America L.P.

100 Processing Effects on the Aging Characteristics of NR

Jim Shell, Cabot Corporation

Ting Wang, Cabot Corporation

Viktor Vejins, Cabot Corporation

Yee Ling Wong, Cabot Corporation

101 Novel, Aminic Antioxidant, Antiozonant and Antifatigue for Rubber Compounding

Chris Fagouri, CIBA Specialty Chemicals

Joe Fay, CIBA Specialty Chemicals

Gerrit Knobloch, CIBA Specialty Chemicals, Inc. , Switzerland

102 Novel Compounding Techniques to Enhance the Performance of Hydrogenated Nitrile Rubber (HNBR)

Nick Sandland, Zeon Chemicals Europe Ltd. , U.K.

109 A Review of the Different Mixing Methods and Process Additive Influences in Black and Silica Filled Compounds

Colin Clarke, Schill & Seilacher Struktol AG , Germany

Manfred Hensel, Schill + Seilacher Struktol AG , Germany

111 Improvements in Processing of Silica Compounds: Optimization of the Mixing Equipment

Wilma Dierkes, Twente University , The Netherlands

J. W. M. Noordermeer, University of Twente , The Netherlands

Kai-Udo Kelting, Paderborn University , Germany

Andreas Limper*, ThyssenKrupp Elastomertechnik , Germany

121 Impact of Using Maximum Rotor Control on Rubber Mixing

Lars I. Lattstrom, Hagglunds Drives, Inc.

Fall 2004

53 4-E Cure Systems: Environmentally Safe, Economical, Exposure-less, Easy to Use

Bonnie L. Stuck, Chemical Technologies, Ltd.

Patricia M. Czomba, Chem Technologies, Ltd.

Rebecca A. Freeman, Chem Technologies, Ltd.

Mark J. Schill, Chem Technologies, Ltd.

Donna L. Decker, Chem Technologies, Ltd.

55 Naphthenic Oil - A Non-toxic Rubber Plasticizer

Marika Joonas, Nynas Naphthenics

56 Improving Silane Coupling to Rubber: The Use of a Zinc Processing Additive

John VanderKooi, Struktol Company of America

57 Moisture Level Effects on Hydrolysis Reaction in TESP/Silica/CB/S-SBR Compound

Kwang-Jea Kim, Struktol Company of America

John VanderKooi, Struktol Company of America

58 Use of a Waste Natural Gum as a Multi-Functional Additive in Rubber

Soma Guhathakurta, Indian Institute of Technology

S. Anandhan, Indian Institute of Technology, India

Nikhil K. Singha, Indian Institute of Technology , India
R. N. Chattopadhyay, Indian Institute of Technology , India
Anil K. Bhowmick, Indian Institute of Technology , India
