Thermoplastic Elastomers and Vulcanizates (TPE & TPV) Symposia 2000-2004

Papers Presented at the meetings Of the Rubber Division, ACS

Papers available for $15 each for Division members, $35 each for Non-members from:

Christopher Laursen
Science & Technology Librarian
Rubber Division, ACS
The University of Akron
Auburn Science & Engineering 104
Akron, Ohio 44325-3907 USA
phone: 330-972-7197
fax: 330-972-5574
email: laursen@uakron.edu

Fall 2000

61 Thermoplastic Elastomers and Rubber-Toughened Plastics from Recycled Rubber and Plastics
Helen S. Liu, University of Massachusetts-Lowell
J. L. Mead, University of Massachusetts Lowell
R. G. Stacer, University of Massachusetts Lowell

1 Fifty Years of Thermoplastic Elastomer Innovations.
Sabet Abdou-Sabet, Consultant

2 New Thermoplastic Vulcanizates (TPVs).
Nadim Qureshi, Teknor Apex Company
Steve Martel, Teknor Apex Company
Keith Saunders, Teknor Apex Company
Jitender Batra, Teknor Apex Company
Raman Patel, Teknor Apex Company

3 Blends of Butyl and Bromobutyl Rubbers and Polystyrene-Polysobutylene-Polystyrene (PS-PIB-PS) Block Copolymers with Improved Processability and Physical Properties
Judit E. Puskas, The University of Western Ontario, Canada
Gabor Kaszas, Bayer Inc., Canada

4 Clear and High Heat Resistant TPEs.
Y. Martin Lu, GLS Corporation
Joe Kutka, GLS Corporation

20 New High Performance Aromatic TPU Elastomers.
David D. Russell, Akron Polymer Laboratory, Inc.
Chris S. Moore, Optimer, Inc.

21 Polyether Block Amide Resins: Bridging the Gap Between Thermoplastics and Rubbers.
Gary M. Dennis, ATOFINA Chemicals, Inc.
Greg O'Brien, ATOFINA Chemicals, Inc.

22 Effect of Polyamide Grafted Compatibilizer on the Adhesion of Thermoplastic Vulcanizates to Polyamide Substrates.
Reza Sadeghi, DSM Thermoplastic Elastomers
Edwin Willems, DSM Research, The Netherlands
Ryszard Brzoskowski, DSM Thermoplastic Elastomers

23 The Use of Chemical Additives to Protect SBS Rubbers Against Ozone Attack.
C. A. Moakes, Bayer AG, Germany
24 Micromechanical Testing of Polyisobutylene-Polystyrene Block-Type Thermoplastic Elastomers
S. St. Lawrence, The University of Western Ontario, Canada
D. M. Shinozaki, The University of Western Ontario, Canada
M. Gerchcovitch, The University of Western Ontario, Canada
U. Myler, The University of Western Ontario, Canada
J. E. Puskas, The University of Western Ontario, Canada
Gabor Kaszas, Bayer Inc., Canada

25 Understanding Color Technology.
Scott A. McCabe, GLS Corporation

38 Incorporating the Use of Thermoplastic Elastomers, TPEs, in Multicomponent Structural Plastic Part Designs
Rob Banning, TriMax LLC
Carl Howarth, Trimax L.L.C.
Joe Muhs, Trimax

39 TPV Automotive Weatherseal Design: Glass Run Channel Case Study.
Scott D. Schrader, Advanced Elastomer Systems, L.P.
Viktor Wilhelmy, Mantra Corporation

40 Structure and Properties of Oriented Thermoplastic Elastomer Filiment and Films.
Ismat Ali Abu-Isa, General Motors Corp.

41 Effect of Vinyl Silane Grafted Polypropylene on Foamability of Thermoplastic Vulcanizate Containing a Water Releasing Compound.
Yundong Wang, DSM Thermoplastic Elastomers
Edwin Willems, DSM Research, The Netherlands

42 Bonding of Thermoplastic Elastomers to Plastics During Multi-component Injection Molding Processes.
M. Mehta, University of Massachusetts Lowell
G. Verma, University of Massachusetts Lowell
Carol M. F. Barry, University of Massachusetts Lowell
R. G. Stacer, University of Massachusetts Lowell

43 Multi Layer Molding Employing "The EstaGrip ™ TPE System."
Gilbert Martello, BFGoodrich

44 Regulations and Standards Impacting Uses of Thermoplastic Elastomers.
Charles P. Rader, Advanced Elastomer Systems, L.P.
Joseph E. Pfeiffer, Advanced Elastomer Systems, L.P.

Garrett L. Gee, Kline & Company
Jay Dwivedi, Kline & Company
Ostin H.C. Tan, Advanced Elastomer Systems, L.P.
Shaival Mehta, Advanced Elastomer Systems, L.P.

Spring 2001

Applications of Titanate and Zirconate Coupling Agents in Thermoplastics and Thermoset Elastomers - 2001
Salvatore J. Monte, Kenrich Petrochemicals, Inc.

Fall 2001

Electrical Applications for Thermoplastic Vulcanizates
Joseph E. Pfeiffer, Advanced Elastomer Systems, L.P.
Jeff Smola, Advanced Elastomer Systems, L.P.
Christian Gustin, Advanced Elastomer Systems NV/SA, Belgium

Crosslink Densities and Phase Morphologies in Thermoplastic Vulcanizates
Maria D. Ellul, Advanced Elastomer Systems, L.P.
Andy H. Tsou, ExxonMobil Chemical Company
Weiguo Hu, ExxonMobil Chemical Company

Spring 2002

A Study of the Effect of Rubber Curatives on Low Density Polyethylene in a Thermoplastic Elastomer Blend
Kathy Garde, University of Port Elizabeth, South Africa
C. D. Woolard, University of Port Elizabeth, South Africa

Investigating the Microscopic Properties of Thermoplastic-elastic Polymers using Pulsed Force Mode SFM
Sabine Hild, University of Ulm, Germany
Kai Schroth, University of Ulm, Germany
Andreas Doering, University of Ulm, Germany
The Rubber/Thermoplastics Continuum
Charles P. Rader, Consultant

Case Studies for Thermoplastic Vulcanizates After Real-life Applications
Joseph E. Pfeiffer, Advanced Elastomer Systems, L.P.
Andre Van Meerbeek, Advanced Elastomer Systems NV/SA, Belgium

A Study on Thermoplastic Elastomer Blends Using Rubber Powder
Sung Hyuk Hwang, Gyeongsang National University, Korea
Sung Hyo Lee, Gyeongsang National University, Korea
Jin Kuk Kim, Gyeongsang National University, Korea
Shi Xinyan, Gyeongsang National University, Korea

Novel Thermoplastic Vulcanizates Which Demonstrate Excellent Adhesion to Metal Substrates During Melt Processing
Marvin C. Hill, Advanced Elastomer Systems
Mike Goncy, Advanced Elastomer Systems, L.P.

New Developments for Oil and Fuel Resistant Thermoplastic Vulcanizates
Robert H. Schuster*, Deutsches Institut fur Kautschuktechnologie e.V., Germany
M. Blume, Deutsches Institut fur Kautschuktechnologie e.V., Germany
A. Rynka, Deutsches Institut fur Kautschuktechnologie e.V., Germany

Dynamically Vulcanized PP/EPDM Blends: Effects of Different Types of Peroxides on the Properties
K. Naskar, University of Twente, The Netherlands
J. W. M. Noordermeer, University of Twente, The Netherlands

Novel Dendritic (Arborescent) Polyisobutylene-Polystyrene Thermoplastic Elastomers
Judit E. Puskas, The University of Western Ontario, Canada
Santanu Chattopadhyay, The University of Western Ontario, Canada
Yongmoon Kwon, The University of Western Ontario, Canada
A. K. Naskar, The University of Western Ontario, Canada
A. K. Bhowmick, Indian Institute of Technology, India

Continuous Ultrasonic Process for in-situ Compatibilization of Polypropylene/Natural Rubber Blends
Jeong Seok Oh, The University of Akron
A. I. Isayev, The University of Akron
M. A. Rogunova, Polymer Diagnostics, Inc./PolyOne Corporation

Morphology of Thermoplastic Elastomers Studied by Atomic Force Microscopy
M. A. Rogunova, Polymer Diagnostics, Inc./PolyOne Corporation
41 Streamlining New Product Development in TPEs
John Quarmley, Principia Partners
Lou Rossi, Principia Partners
Jim Morton, Principia Partners

42 Aliphatic TPU Systems for Light-stable Applications
Gerald DiBattista, Bayer Corporation
Wolfgang Kaufhold, Bayer Corporation

43 High Performance Clear Thermoplastics Elastomer
Jiren Gu, GLS Corporation
Tom Castile, GLS Corporation

44 Stretching the Envelope: Two Groundbreaking New Applications of TPE to Automotive Body Sealing
Wesley Thompson, GDX Automotive/International Headquarters

45 Enhancing Metallocene TPE’s Performance for Extruded Applications
Laura B. Weaver, DuPont Dow Elastomers L.L.C.
Henry Heck, DuPont Dow Elastomers L.L.C.
Dan G. Moldovan, DuPont Dow Elastomers L.L.C.

63 Evaluation of Slip Coat Materials Co-extruded on TPVs for Automotive Weatherseal
Reza Sadeghi, DSM Thermoplastic Elastomers

64 TPE Overmolding Solutions for Engineering Thermoplastics
Rajesh Varma, GLS Corporation
Dan Liu, GLS Corporation
Walter Ripple, GLS Corporation

65 Hard/Soft Overmolded Parts with Kraiburg TPE Thermolast K: Material Combinations, Processing, Testing of Adhesion
Joerg Saenger, Kraiburg TPE GmbH, Germany

66 MPR Provides Processing Advantages
Dave Santoleri, APA-Ferro

67 Relaxation and Mechanical Properties of Foamed Thermoplastic Vulcanizates
Scott D. Schrader, Advanced Elastomer Systems, L.P.
Abdelhadi Sahnoune, Advanced Elastomer Systems, LP
Spring 2003

   Roderic P. Quirk, The University of Akron
   Kuo-Chih Hua, The University of Akron
   Lei Zhu, The University of Akron
   Sergio A. Moctezuma E., The University of Akron

8 Effects of Composition and Processing Conditions on Morphology and Properties of Thermoplastic Elastomer Blends of SEBS/PP/Oil and of Dynamically Vulcanized EPDM/PP/Oil
   Pratip Sengupta, University of Twente, The Netherlands
   J. W. M. Noordermeer, University of Twente, The Netherlands

26 How Effective is Flow Simulation Software for Predicting Critical Parameters in the Injection Molding of Thermoplastic Elastomers?
   Carol M. F. Barry, University of Massachusetts Lowell
   Joey L. Mead, University of Massachusetts Lowell
   Rohan Dave, University of Massachusetts Lowell
   Siddhartha S. Desai, University of Massachusetts Lowell
   Nupur Patel, University of Massachusetts Lowell

27 Comparative Evaluation of Flexible-TPO/TPE Compounds of Ethylene/1-Octene and Ethylene/1-Butene Elastomers
   Avi C. Gadkari, DuPont Dow Elastomers L.L.C.

78 Using a Novel Capillary Rheometry Technique to Investigate Two Families of Commercial Thermoplastic Vulcanizates (TPV)
   Jean L. Leblanc, University P. & M. Curie (Paris VI), France
   Thoranit Navarat, University P. & M. Curie (Paris 6), France

81 Study on the Waste Tire Powder/Thermoplastic Blends
   Jin Kuk Kim, Gyeongsang National University, Korea
   Sung Hyo Lee, Gyeongsang National University, Korea
   Sung Hyuk Hwang, Gyeongsang National University, Korea
High-Performance 150C Capable Thermoplastic Vulcanizates (TPVs) - Long-Term Aging Behavior and Processing
Brian J. Cail, Zeon Chemicals L.P.
Robert D. (Bob) DeMarco, Zeon Chemicals, L.P.
Charles T. Smith, Zeon Chemicals L.P.

1 High Molecular Weight EPDM via Metallocene Catalyst and Gas Phase Process
Rajan G. Vara*, DuPont Dow Elastomers L.L.C.
Christian Daniel, DuPont Dow Elastomers S.A., Switzerland
John Pillow, DuPont Dow Elastomers S.A., Switzerland

2 A New Nordel MG EPDM Product Development - NDR 37060
Arnis U. Paeglis, DuPont Dow Elastomers L.L.C.

3 Third Generation Metallocene EPDMs - Nordel MG Hydrocarbon Rubbers
Morris S. Edmondson, Du Pont Dow Elastomers L.L.C.

4 Ethylene Elastomers: A Comparison of Conventional Ziegler-Natta and Metallocene Products
Bruce A. Harrington, ExxonMobil Chemical Company
M. G. Williams, ExxonMobil Chemical Company

5 Styrene-Butadiene Random Copolymer as Performance Enhancing Additive in Thermoplastic Elastomers
Manoj Ajbani, The Goodyear Tire & Rubber Company
Chris Kiehl, The Goodyear Tire & Rubber Company
Andy Takacs, The Goodyear Tire & Rubber Company

6 New Vamac Polymer with Improved High Temperature Flex Resistance
Yun Tai Wu, E. I. DuPont de Nemours and Co., Inc.
Douglas King, E. I. DuPont de Nemours and Co., Inc.
K. Kammerer, E.I. du Pont de Nemours & Co., Inc., Switzerland

7 DuPont Developments in TPEs
Jim Pike, DuPont
Amy Schantz, DuPont EP
Katherine Cook, DuPont EP
Spring 2004

C Fundamentals of Thermoplastic Elastomers Produced by Dynamic Vulcanization
Tonson Abraham, Advanced Elastomer Systems L.P.
Colleen M. McMahan, Advanced Elastomer Sys., L.P.

Fall 2004

70A The Story of Thermoplastic Vulcanizates: Product Development and Technical Strategies for Commercial Success
Sabet Abdou-Sabet, Consultant

71 Technical Marketing for TPE Suppliers
John M. Christensen, TriMark

72 Next Generation of Soft TPUs
Gerald DiBattista, Bayer Corporation
Eva Gestermann, Bayer AG, Germany
Wolfgang Kaufhold, Bayer AG, Germany

73 New Fast Molding TPV Grades
Ashok M. Adur, PolyOne Corporation
M. A. Rogunova, Polymer Diagnostics, Inc./PolyOne Corporation

74 New Highly-Crosslinked TPEs Based on VNB-EPDM with Improved Compression Set
Maria D. Ellul, Advanced Elastomer Systems, L.P.
P. S. Ravishankar, ExxonMobil Chemical Company

75 Causes and Prevention of Gas Fading in Thermoplastic Elastomers
Leonard H. Davis, Cytec Industries, Inc.
Joseph E. Pfeiffer, Advanced Elastomer Systems, L.P.

76 Evaluation of the Fatigue Properties of a Novel Polyisobutylene-Polystyrene Thermoplastic Elastomer in Comparison with Other Rubbery Biomaterials
Judit E. Puskas, The University of Akron
Mirosława El Fray, Technical University of Szczecin, Poland
Matthew Tomkinson, The University of Western Ontario, Canada
Volker Altstadt, University of Bayreuth, Germany
