ENGINEERING YOUR SUCCESS

Solving the world’s greatest engineering challenges is a responsibility we take seriously, and one that requires more than just the brightest engineers in the world. It takes accountants, customer service specialists, supply chain managers, information technology specialists and manufacturing professionals.

Our global success is based on a simple equation. An empowered workforce operating in an environment that is open and friendly breeds ideas and solutions. We encourage and trust our employees to pursue ideas, and more importantly, we listen to them. When we win, we recognize employees and team achievements by providing career growth opportunities with a global company.

Process Cost Engineer
Parker Hannifin Corporation, Chomerics Division
Woburn, MA

PARKER CHOMERICS is a global supplier of EMI shielding, thermal interface materials, plastics and optical products. We offer a worldwide network of applications engineering support, manufacturing facilities, and sales offices. With stocking and fabrication on five continents, our products are available anytime, anywhere.

With Headquarters in Woburn, MA, Parker Chomerics is part of a global Fortune 500 company but has a small company feel. We thrive on high performance teams that are empowered to make decisions on both a big and small scale. We strive to make a positive impact on the lives of our employees by establishing an inclusive, caring and friendly work environment. We encourage the continued education and skill development of our teams and offer advancement opportunities at a global division. If you’re looking for a fast paced, collaborative environment where you can be at the cutting edge of engineering solutions, look no further. This opportunity is with the Elastomers Business Unit in Woburn, MA.

Position Summary:
To develop a competitive edge by ensuring capable process and operational excellence (Safety, Quality, Delivery and Cost). Evaluate new processes and improve current process capability, efficiency, and overall productivity in all areas of manufacturing in support of the Corporate WIN Strategy.

Essential Functions:
- Refine and enhance processes by applying continuous improvement and key Lean manufacturing/production principles and techniques to areas of production. Recommend product changes/improvements to Core Engineers. Drive productivity improvements through value stream projects.
- Improve manufacturing efficiency by analyzing and planning workflow, space requirements, and equipment layout. Coordinate input that may cross multiple teams or areas; make recommendations and implement changes.
- Assure product and process quality by designing testing methods, testing finished product and process capabilities, and establishing standards to confirm and validate manufacturing process requirements. Determine root cause of failure using statistical methods (e.g., design of experiment, SPC) that may result in changes in design, tolerances, or processing methods.
• Determine the ‘Best Practice’ process approach of material, tooling, equipment and labor process.
• Identify and implement solutions for issues relating to safety, quality, productivity, and cost reductions.
• Prepare documentation for new manufacturing processes and engineering procedures. Prepare reports summarizing analyzed process information and trends.
• Share specialized knowledge with others. Represent Company on specific projects, lead and participate on project teams.
• Create decision tree for costing the processes within area of responsibility. This includes developing production rates for standard processes and maintaining process routings.
• Other duties as assigned

Qualifications:
• Bachelor of Science degree in engineering discipline.
• 3 years of experience in manufacturing environment.
• Prior experience supporting extrusion or molding processes is desired.
• Experience in Toyota Production and Value Stream manufacturing methodology a plus
• Must be a US Citizen or have US Permanent Resident Status.

Please apply online at www.parker.com/careers. No phone calls please.

Parker is an Equal Opportunity and Affirmative Action Employer. Parker is committed to ensuring equal employment opportunities for all job applicants and employees.
