Completed 6 months comprehensive in-plant training In lean manufacturing and 5S environment.

Projects Involved:

1. Involved in many new product development projects and plant trials.
2. Involved with process development projects in compounding department and reduce rework.

Dipped Products PLC, Kottawa.

Aug 2012 to Present

Currently I am working as assistant manager process in technical department and worked as executive R&D. I am the person who responsible for the Electricians' Glove production process from planning stage to packing. I have developed electrician glove process to improve passing rate which is major breakthrough for DPL. Also developed bead roll electrician glove which was accepted by USA and also developed class 4. With above developments and to cater the market requirements I involved in capacity increase project of electrician glove also commissioning second electrician glove plant at DPL. I have to involve with technical issues as well as operational issues and I have to lead the team to complete Electricians' Glove orders to target date. Apart from electrician glove project , I am responsible for process controlling of main three glove manufacturing plants including one nitrile glove plant.
