

# **Ekaterina Terentyeva, 32**

41 rue Camille Desmoulins, 10

31400 Toulouse, France

lomo13@yandex.ru

An engineer-chemist with over 5 years of professional experience in rubber industry, including development new products, handling R&D, production operations and quality control with proven analytical skills and demonstrated problem solving and organisational ability

## **JOB EXPERIENCE**

2014- Now – Chemical engineering consulting, Russia and Tunisia

2010-2012 – Head of Laboratory, Rubber Institute,  
Ural Plant of Rubber Technical Products, Yekaterinburg

2007-2010 – Chemical Engineer, Rubber Institute,  
Ural Plant of Rubber Technical Products, Yekaterinburg

2005-2006 – Assistant,  
Analytical Chemistry Laboratory  
Ural State Technical University – USTU, Yekaterinburg

## **EDUCATION**

2003-2008 Engineering in Organic Chemistry (elastomers), diploma with  
excellence

Ural State Technical University  
Yekaterinburg,  
Russia

## **KEY SKILLS**

Team Management

- Led a team of 9 research and production personnel
- Carried out performance reviews and provided feedback for areas of improvement

- Delivered training, ensuring safety consciousness and discipline among employees

## R&D

- Prepared project plans/ schedules for the laboratory operations
- Leadership projects for development new products (including products for military purposes) with or without collaboration with research teams
- Controlled technical parameters of technological processes (mixing, profile extrusion, vulcanisation)
- Controlled and analysed quality of new products, improved (if it is necessary) quality of rubber by correction recipe or changing technical parameters
- Developed the technical documentation for new products

## Production

- Implemented the R&D results in the production system
- Assured the successful implementation of the R&D output in the industrial production newly developed products
- Used Navision ERP tool for materials' usage estimation

## Customer service and trainings

- Cooperated with end customers (including Ministry of Defence Russian Federation) by receiving technical tasks for new products
- Performed final results according to needs of customers
- Provided customers all necessary information on each stage of project and final documentation
- Cooperated with different research teams, project partners for better collaboration
- Attended conferences, trainings, exhibitions

## LANGUAGES

- Russian (native)
- English (advanced)
