

Rubber Division, ACS Training Delivery Options

Classroom Courses: From two days to several weeks in duration, these in-person courses teach essential skills, methods and tools for improving process, product and business performance. These courses are great if you want live learning with the physical presence of an instructor and other students. Rubber Division, ACS offers CEUs for classroom courses.

Online: Three online courses are available, which can be taken at your own pace. This is an affordable option for those who need flexibility, but don't want to sacrifice quality. The Basic, Intermediate and Advanced Online Courses are issued CEUs from The University of Akron upon completion.

Blended Learning: This is a mix of classroom and online learning, blended as you wish to meet your unique training needs. All blended programs are customized for the learner and their organization based on their needs, and pricing reflects their specific configuration.

Remote Learning: Sometimes you can't physically attend a class, however, can participate as if you were there via live webcam. Some courses offer this option to students who need to learn, but don't have the opportunity to travel.

Regional Courses: These are courses offered throughout the United States in various regions as outlined by our Rubber Groups. Topics are selected based on the industries in those regions and are designed to bring the new technology and information closer to the people and companies who need it.

Webinars: Webinars are self-paced 60-90 minute PowerPoints with an instructor voice over to explain the concepts and prime your thinking to get you ready for the longer developed courses on the same topics. Six webinars are offered and they can be taken at your own pace. There is no completion certificate for the webinars. This is an affordable option for those who need flexibility, but don't want to sacrifice quality.

Customized: Sometimes a company wants their New Hire Training developed by us and branded to their company. We can work with you to develop this, as well as to specifically design our course to your company and the machinery you use. We also run across training that needs to be delivered in different regions and to people speaking different languages. We do our best to accommodate this and will work with you on customizing your training needs.

Open Access: This is a Members Only benefit. Access free webinars for individual use. Go to www.rubber.org/store, sign in using your email and password, then click the Free Webinars tab.
